The Transactions of the Day Attended by Substantial Declines.

The Morning's Business Opened Dull, But Was Succeeded by Considerable Activity - Nervousness Over Outlook - Traction Shares Heavy.

market was as uniformly weak as yesterday's was steady, but the results in respect to prices were much more extensive In the first hour, the market was extremely dull and the fluctuations were insignificent in every way. Subsequently, greater activity developed and the heavler transactions were attended by general and substantial declines. Little or nothing happened in the course of the day that was not fully known at the opening. As has been the case some time interest was centred upon the anthracite coal labor-

peared this morning to be somewhat more discouraging and as regarded the political outlook it seemed to be the common conclusion that increased nervousness and anxiety were likely to attend the course of the campaign up to the time of the election. Yesterday's indications of some what closer money market conditions were also strengthened today, as lenders marked up the rates for renewals of loans and current quotations for money on call were generally made at advanced fig-At the same time, as already noted, none of the circumstances cited exhibited any actually new phases and they were certainly not accentuated to a degree which would account for, of themselves, the material declines recorded in the

The absence of important developments was not supplied by novel occurrences bearing on particular stocks. As a matter of fact, in a few cases, where speculative circumstances could be cited in particular stocks the declines were no more extensive than these recorded in the general market. In the instance of Brooklyn Rapid Transit, for example, it was attempted to make capital out of the introduction into the board of aldermen of a resolution looking to forcing the company to place its trolley wires under The absence of important developments a resolution locking to foreing the com-pany to place its troller wires under ground, but as a matter of fact, Brookiya Rapid Transit was no more depressed than were Metropolitan Street Railway, or Manhattan. All of these stocks were deubtless particularly affected by the prespective final judicial settlement of the phases of the franchise tax law, now in litteration.

in litigation. All of the steel industrial stocks were also notably weak. But little or nothing that was definite attended the selling in that quarter of the market. There were a number of substantial declines in the railway list, particularly in Burlington and Quincy. St. Paul. New York Central, the Atchison shares, and the Pacific stocks, but it was difficult to align their tendency with any naticularly vehicle developments. with any particularly related developments. As was to be expected in view of the ab-sence of any generally known circum-stances which would explain the market's tendency, conjecture was active as the reasons for the decline, but apart from the views as to the position and the operations of certain large professional traders, explanations were not forthcoming. Lon-don was again a factor of little account in the market in any respect.

	_			

There was well-defined weakness in the stock market yesterday afternoon, prices declining from a fraction to three or four points under the influence of hear manipu lation of a vigorous kind. Business was dull, and save for the slipping away of prices, the market was entirely in accord with that of every day in recent weeks, unimportant and uninteresting. The influences which were used as bear arguments and on which the short sellers based their operations were the news of many additional recruits to the striking miners, the talk of the bad effect that the strike will have on Mr. McKinthat the strike will have on Mr. McKin-ley's chances for re-election, the reitera-tion of the tight money gosaip, and the boom in the price of wheat. It may be stated very positively, however, that there was little actual selling of long stock on account of any of these factors. It is undoubtedly the fact that these matters, or some of them at least, are legitimate bearish infusences. at least, are legitimate bearish influences but the more important consideration is that prices are now at a very low level and that the present holders of securities, are largely those that have bought at present prices or lower with the intention of holding until there is a large and permanent advance. These se-curity holders recognize that the builtsh items in the general situation far out-weigh the bad and that any slight decline that may be engineered by the hears cannot be permanent.

rates will be advanced, but, on the other the commission house tarde which abhand, it is equally certain that there will be no real stringency. The New York banks have more money at present than at the same time in any recent year. More than that, the country at large is and 5.8 Louis. Liverpool was firm and 5.8 higher. Project the block was firm and 5.8 higher. Project the project the realizing sales of local operators. at the same time in any recent year. More than that, the country at large is more plentifully supplied than ever before, which makes it certain that high rates in New York would quickly attract a flood of cash to that centre. Even the possibility of gold exports in connection with the big loans to the various Europe's Governments does not worry the New York bankers. On the other hand, these loans are considered a bullish item.

There was a good cash demand. The seaboard reports sixty loads taken.

Oata very dull, closing at about yesterday's prices. The only feature of the mar-

in the situation by those who look beyond the immediate fractional fluctuations of ecurity prices.

As to the bugbear much flaunted earlier in the year that the election of Mr. Bryan would mean a panic in business generally and a tremendous slump in stock mar-ket prices a larger and larger percentage of the conservative people of Wall Street are beginning to see the foolishness of such threats. Many of the most importaut railway and financial men have been quoted in New York papers and elsewhere as saying that the presperity of the counthe Strike Situation and Political try will continue no matter who is elected

The news yesterday included a number of interesting railway earnings statements for the second week of September. It is NEW YORK, Sept. 19.—Teday's stock to be noted that all of these statements show a continuance of the increases in ay's was steady, but the results in resaid by the hears regarding the certainty of decreases. Last year was by far the finest year in the history of American railways up to that time as far as gress earnings were concerned. Notwithstanding this fact, every week so far this year has shown a large increase over last year's figures. This is more of a good thing than was expected even by the bulls. It is more than they had any right to expect. The gross earnings of the Chearpeake and Ohio for the week show an incréase of \$25,700, and for the period since July 1 they show an increase of \$340,469, ers' strike, the Presidential campaign, and
The gross of the Southern Rallway for
money market possibilities.
On the whole, the strike situation ap\$15,689 and \$383.281. The gross earnings of the Missouri Pacific for the week show an increase of \$47,000, since January 1 it shows an increase of \$1,829,018. The Norfolk and Western increases for the week and for the period since July 1 are \$48,-140 and \$527,890 respectively.

The anthracite coal securities were on the whole affected less than might have been expected, under the circumstances, when the developments of the coal strike are evidently the chief cause of the weak-ness of the market generally. Reading first preferred went off to 533-4 and recovered to 54 I-8 at the close. Jersey Central de-clined to 129 and closed at the bottom. Bal-timore and Ohio common went off a point and a half to 68 3-4 and closed on the bot-tom. Pennsylvania was one of the weak members of the group, getting as low as 126 I-2 and closing at that figure. It was said that one of the bulliship inclined said that one of the bullishly inclined

been expected, closing at H6, only a p lit off for the day. There is gossip around the Street that this stock is a purchas-for a good advance. This may have been put out in order to allow the insiders to sell out casily or it may have some foundation, but in either case the stock is as usual a very dangerous one to fool with, if one has any desire to keep his

THE CHICAGO GRAIN MARKET. Wheat Goes Up. Making a Gain of 1.3-1 Cents,

CHICAGO, Sept. 15.—The wheat market was strong and buoyant, advancing 13-1c. The chief bull incentive was a strong Northwestern market, which went up over It is very nearly certain that the money 2 cents. There was a large increase in

The Standard Butterine Co. \$5 Per Man MONEY. Dr.

A Rare Chance to Get In on the Ground Floor of a New Company Sure of a Large Business Paying Immense Profits.

The Standard Butterine Company is incorporated under the laws of the State of West Virginia, with a capital stock of \$1,000,000, divided as follows:

5,000 shares Preferred Full-Paid, Non-assessable-par value

\$100 per share—\$500,000. 5,000 shares Common Stock-\$500,000,

The Preferred Stock is guaranteed to pay eight per cent per annum, and the Common Stoc't is expected by the most conserva-

tive calculations to pay at least FIFTEEN PER CENT after the first year of business

Messrs. Gurley & Johnson, bankers and brokers, of this city, and members of the New York Stock Exchange, are about to place two hundred thousand dollars' worth of the Standard Butterine Company's Stock. They will sell Preferred Stock at par -\$100 per share—and will give as a bonus ONE SHARE OF THE COMMON STOCK WITH EVERY SHARE OF PREFER-RED STOCK BOUGHT

It is desired to place this stock with the Washington public, and after it is placed application will be made to have the stock listed on the Washington Stock Exchange.

This is an exceptional opportunity for an investment which cannot fail to prove highly profitable.

The object of the company s to manufacture a high grade of Butterine, and its officers are men of wide experience in this line The President of the Company, Mr. W. P. Wilkins, has been

engaged in the business for years, and is certainly thoroughly competent to place the company on an immediate paying basis, The company has secured eight and three-quarters acres of

ground on the Baltimore and Ohio Railroad, known as the Clark Mills Property, and has purchased abroad the latest improved machinery for the manufacture of Butterine.

The erection of the plant and installment of machinery will be supervised by expert men, and everything possible will be done to insure a perfect product. THE COMPANY ALREADY HAS FROM RESPONSIBLE

DEALERS ORDERS FOR FOUR HUNDRED THOUSAND POUNDS BUTTERINE A MONTH, TO BE TAKEN JUST AS SOON AS IT IS POSSIBLE TO PLACE THE FACTORY IN

The profit in Butterine making is very large, and although the field is practically a new one, the demand is strong and certain.

In no other legitimate way can such large profits be made as in the manufacture of a high grade of Butterine.

The possibilities of the business are shown by the fact that in the little country of Holland eight hundred million pounds of Butterine are made every year-nearly ten times the present entire product of the United States.

Nearly all the early prejudice against Butterine as an article of food has disappeared. It is becoming known as a perfectly pure and wholesome article of food, possessing none of the disadvantages of butter, kept without difficulty in all climates and all kinds of weather, and con-posed only of food products used habitually on every table.

Dr. Wiley, Chief Chemist of the Department of Agriculture, stated before the House of Representatives Committee on Agriculture, that this was a "nutritions and wholesome article food, composed practically of the identical ingredients of but-

With the orders now in sight the company can by actual figures, which will gladly be shown to all interested, make a net profit of nearly two hundred thousand dollars a year, which is sufficient to pay EIGHT PER CENT ON THE PREFERRED STOCK OF THE COMPANY, OR TWENTY PER CENT OF THE . ENTIRE CAPITALIZATION.

It should also be stated that the plant of the company will also make one hundred tons of ice every twenty-four hours, and the profits from this alone will pay coal bills, engineers', and firemen's salaries, and thus provide power for running the plant absolutely without cost.

This brief statement of the facts in regard to the company should interest all investors looking for an absolutely safe, and at the same time, highly profitable investment.

The company stands ready to offer the fullest proof upon all points, and to give intending investors full satisfaction upon any question which they may raise, Preferred Stock to be sold at par being limited in quantity,

it is suggested that early application be made. Apply for information and make application for stock to
